

Delta

شركة دلتا

Corporate Profile

Our Missions and Vision

Company Mission

The regional leader for all technical needs in asset construction and maintenance

Company Vision

Providing superior engineering solutions and ensuring customer satisfaction by adhering to highest standards of quality

42-year history in contracting

Successful expansion beyond its original core of telecom and broadcasting to power Longstanding contracts with clients like Saudi Broadcasting Corporation, Saudi Electricity Company, Ministry of Defense and others

History, vision and mission

Delta has a long and successful history, having established itself as a strong player in the Saudi construction market.

1976

Founded by Mr. Mohammed H. S. Tarabulsi; Delta was established as a sole ownership establishment. The company at the time was called, "Delta Electro Mechanic Establishment". The main focus and line of business at the time was to operate in the fields of Telecommunications and Broadcasting.

1980

We introduced live coverage of the holy city of Makkah and Hajj for the first time in Saudi history. That included recording the first Eid prayer then sending it to Amman, Jordan for broadcasting before Saudi TV had its broadcasting equipment. We worked closely with the Ministry of Culture & Information to get the royal approval for the creation of Makkah studio in the Holy Mosque.

1984

We provided the operations and maintenance of Electro Mechanic Equipment in all telecommunications buildings in Saudi Arabia making Delta the backbone of all communication sectors throughout the Kingdom of Saudi Arabia.

1987

Delta formed an alliance with Bell Canada and took over the operations & maintenance for Saudi TV Network in all its locations expanding its manpower to almost 600; tripling its size.

History, vision and mission

1992

We were officially responsible to handle operations & maintenance for all Satellite communications throughout the Kingdom of Saudi Arabia in this year

2003

By this year, we completed tasks in the fields of telecomm, broadcast and electrical works amounting to more than SAR 2.8 billion and have established our name well in the market. We also changed our legal structure to a limited liability company called "Delta Electro Mechanic Limited". The average revenue throughout the years was estimated at SAR 80 Million.

2004

Delta aimed and put a target to expand in the Electrical sector (Power Generation, Transmission and Distribution) to take advantage of the experience and to be part of rebuilding the energy and electrical infrastructure of Saudi Arabia. We won contracts for projects related to these fields and established a reputable name where we got qualified with different clients and upgrade in its classification. Our corporate name has changed to "Delta Company Limited" to reflect the diversity of our work.

History, vision and mission

2010

Our annual revenue reached an estimated SAR 250 Million. By then we were undertaking projects in building diesel power generating stations, construction of high voltage 132 KV substations, and involved in other projects in the electrical infrastructure. Moreover, Delta's work included projects in operations and maintenance contracts for the television network in Saudi Arabia, and the operation and maintenance of Gas turbine sites for the Ministry of Defense and Aviation.

2015

Our annual revenue reached an estimated SAR 600 Million. The company in this year has taken the step to change to a closed joint stock company looking forward to improve the company continuity thru this transformation and to improve governance and adding up independent board members.

2015

The Company in this year introduced new shareholders thru selling some of its shares to Investment Bank and Introduced new Board members for a total of 9 members. The aim of this step was to improve the business environment, expand the business and insure continuity thru regulations and governance.

Our Expertise

1 - EPC Power Generation, Transmission & Distribution

Construction of High Voltage substations and cable works up to 132 KV

2 - EPC Broadcasting, Transmission & Telecommunications

Installations of new TV/Radio studios

Microwave links and connectivity solutions

Digital transmissions and satellite earth stations

3 - EPC – Electro-Mechanical

Installation of HVAC systems including AHUs, Ducts ...etc.

Installation of low voltage systems such as CCTV, Surveillance

Installation of fire systems.

4 - O&M – Electrical, Electronics & Mechanical works

O&M of Gas turbines and power generators facilities.

O&M of sophisticated electrical equipment such Studio, transmission, and broadcasting.

O&M of electro mechanical equipment.

Our Board Members

Mr. Mohammed Hassan Suhail Tarabulsi – Chairman

Education	Bachelor's Degree in Electronics Engineering
University	Arizona State University, USA
